

# Wind Catcher Energy Connection has two key philosophies that pertain to power line rights-of-way:

**1.** Line routes should avoid or reduce impacts to the natural and human environment where possible.

**2.** Property owners should be fairly compensated for any land encumbered by the project.

## START WITH:

- Environmental assessments
- Land surveying, soil borings and other fieldwork
- Cultural and historic resource reviews
- Property appraisals

## NOTIFICATIONS AND COMMUNICATION:

- Property owner communications
- Terms and conditions of easement
- Landowner compensation
- Property restoration and mitigation
